# An Update on COVID-19 in Chile

More than 52.6 million vaccines have been administered, with 92% of the target population completing the process (85.2% in the population under 18 years and 93.7% in the population over 18 years). Chile stands out for being the country with the largest share of population vaccinated with booster doses, reaching 93 per 100 inhabitants. In total, 13.9 million booster doses have been administered. Chile has begun the 4<sup>th</sup> dose vaccination process for people over 18 years old.

Chile has received more than 57.8 million vaccines, mostly from SINOVAC and Pfizer-BioNTech.

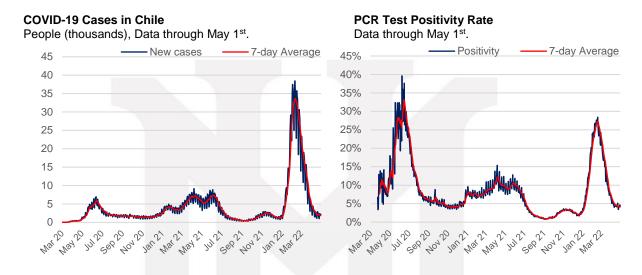

### COVID-19 Vaccine Doses per Supplier: Received & Pending

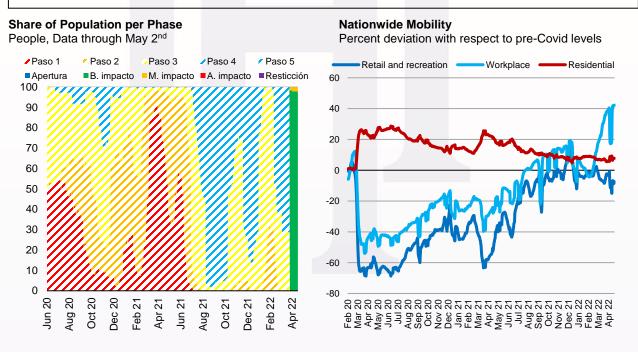

- 10.000.000 20.000.000 30.000.000 40.000.000 50.000.000 60.000.000 70.000.000

May 2<sup>nd</sup>, 2022

During last weeks cases have been decreasing as well PCR test positivity rates. ICU occupancy levels, deaths and hospital capacity remain at moderate levels.

From April 14, 2022, the Chilean government updated the plan step by step, considering three types of health impact phases: low, medium and high. Thus, the sanitary restrictions in border controls have been relaxed.

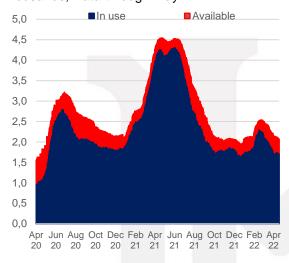

May 2<sup>nd</sup>, 2022

ICU patients have decreased in last weeks, critical bed capacity has moderated.

#### Critical beds

Thousands, Data through May 1st.

# **COVID-19 related Deaths**

People, Data through April 29th.
