An Update on COVID-19 in Chile

More than 44.2 million vaccines have been administered, with 87.1% of the target population completing the process (67.1% in the population under 18 years and 92.1% in the population over 18 years). Chile stands out for being the country with the largest share of population vaccinated with booster doses, reaching 57 per 100 inhabitants. In total, 10.9 million booster doses have been administered.
