## Ministry of Finance informs Euroclearability of Chilean Corporate Debt

In the context of measures that have been implemented in recent years to improve market access and liquidity in the local fixed income market, the Ministry of Finance informs market participants Chilean corporate debt may now be accessed through the market's Euroclearable link.

Chilean issuers will be able to carry out local currency debt placements with the simultaneous participation of local and foreign investors, facilitating the access of these firms to the international liquidity pool, thereby diversifying their investor base and contributing to more competitive borrowing costs.

Euroclearability of Chilean corporate debt has been made possible by adjustments in recent years to the legal framework and tax treatment of the securities, in line with international standards.
